-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of group I, claims 1-14 in the reply filed on 1/31/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3764

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Poulton 5,702,323.

Poulton discloses a local system including at least one exercise apparatus (abstract) and at least one associated local computer (col. 18, lines 13-25), said at least one local computer being in at least one-way communication with said at least one exercise apparatus (col. 18, lines 13-25), a remote system including at least one remote computer (col. 7, lines 8-19), and an internet connection that at least part-time couples said local system to said remote system for at least one way data communication between said local system and said remote system (col. 7, lines 8-19).

As for claims 2-14, Poulton further discloses said local system is one of a plurality of local systems, each of which is in at least part-time communication with said remote computer (col. 7, lines 1 – et seq.), at least one server computer at least part-time communication with said remote computer (col. 7, lines 1 – et seq.), said remote system is one of a plurality of remote systems and each of which is in at least part-time communication with said server system (col. 7, lines 1 – et seq.), said local computer controls an operation of said exercise apparatus (col. 15, lines 9 – et seq.), said local computer is located internally to said exercise apparatus (col. 15, lines 9 – et seq.), said local computer may include at least a portion of a modified script (col. 15, lines 9 – et seq.), said exercise apparatus includes at least one of a bicycle, a rowing machine, a

Art Unit: 3764

step machine, and a resistance trainer (fig. 5), operation may include a resistance setting for said exercise apparatus (col. 15, lines 9 – et seq.).

The method claims 15-17 are inherent in the corresponding apparatus claims and are rejected for the reasons above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Richman whose telephone number is 571-272-4981. The examiner can normally be reached on Mon-Thurs.
